Dear Tim & Folks Robots Girls etc.:

Enclosed find some stray papers in dutch and English that came my way. From that girl Barbara Rubin friend of Jonas Mekas. Seems she was frightened by this dutch Doctor who wrote this paper. Says he wanted to operate on people make a scrape-hole in the cranium where the third eye should be & fill it in with--I didnt get the rest. Apparently the doctor has got a whole robot scene going in Amsterdam. I dont know much about that--just vague gossip from Barbara plus these papers~~x~~ she laid on me. Thought you might like to have them for your bibliographies.

I had a fine time last weekend especially with the goddess on the 4th floor. I found a connection here for DMT incidentally, & will try it again. I guess I liked the DMT since its trip is limited in time so much that it makes me feel much more secure--knowing that if there's anything I am afraid of, it will all be over soon. This time mostly Bosch imagery like the spikey probiscus-thorned vegetable-animals of the garden of Delights. Several days later high on pot at Worlds Fair I saw a fountain which reminded me ~~fm~~ of Bosch fountain & the feeling it gave on the 4th floor. This time a flood of heterosexual warmth, also, ~~very~~ very beautiful after a long time cut off from women, ~~eye~~ several months.

See you soon. Peter sends best. The Intrepid Travelers are disbanded after a last day at the Fair on LSD. Neal stayed till Wed eve to hear Huncke read in the Metro & then jumped in a car to ride back to S.F. & work. Ken Kesey still here but leaving in a week after consultations with Viking.

love  
allen
